

InfoWater Pro Help Documentation

Welcome to the InfoWater Pro Online Help

This online help contains documentation and is a central hub for InfoWater Pro.

Click on the icons below to view specific section contents, or use the navigation bar on the left to find the page that you need. You can also use the search bar to locate specific topics.

 - Annotation
 - Fireflow Run Results
 - Output Unit Manager
 - Customized Report
 - Query Report
 - Query Summation Report
 - Output Relate
- Data Exchange
 - Import and Export EPANET
 - GIS Gateway

- Import and Export Manager
- ODBC Exchange
- Merge Model
- Real Time Data Connection
- Tools
 - 3D Display
 - Elevation Extractor
 - Hydraulic Calculator
 - Info360 Connect
 - Live Data Adapter
 - Pipeline Costing
 - System Schematic

InfoWater Pro Apps

- Allocator
 - Demand Allocator Interface
 - Registering Layers
 - Importing Layers
 - Polygon Layer Registration
 - Allocating Demand
 - Allocation Methods
 - Polygon Extraction
 - Polygon Intersection
 - Geocoded Meter Billing Data
 - Closest Junction
 - Closest Pipe
 - Meter-Junction Allocation
 - Meter-Pipe Allocation
 - Import Meter Data
 - Meter Assignment
 - Edit Polygon Attribute
 - Create Theissen Polygon
 - Demand Allocation Manager - Allocation Tab
 - Demand Allocation Manager - Usage Data
 - Usage Data
 - Allocation Parameters
 - Allocation Options
 - Allocator Report and Water Duty Calculator
 - Quick Start Tutorial: Allocator
- BTX Manager
 - InfoWater Pro BTX Overview
 - BTX Interface
 - Run Model - BTX
 - Trace Model - BTX
 - Display - BTX
 - Quick Start Tutorial - BTX Manager
- Calibrator
 - Calibration Concepts
 - Calibrator: User Interface
 - Calibration Modes
 - Steady State Calibration Mode
 - Fire Flow Test Calibration
 - Extended Period Calibration
 - Steady State - Calibrator
 - Roughness Group
 - Junction Pressure
 - Demand Group
 - Pipe Flow
 - Pipe Status
 - Run
 - Run Summary
 - Export Results
 - Fire Flow for Calibrator
 - Roughness Group: Fire Flow
 - Fire Flow Measurement
 - Run: Fire Flow
 - Run Summary: Fire Flow
 - Export Results: Fire Flow
 - Extended Period Simulation - Calibrator
 - Roughness of Extended Period Simulation
 - Junction Pressure of Extended Period Simulation
 - Pipe Flow of Extended Period Simulation
 - Tank Head/Level of Extended Period Simulation
 - Run of Extended Period Simulation
 - Run Summary of Extended Period
 - Export Results of Extended Period
 - Quick Start Tutorial - Calibrator
- Criticality Assessment Manager
 - InfoWater Pro Criticality Assessment Manager Overview

- Criticality Assessment Manager Interface
 - Criticality Assessment Manager - Based on Model Elements
 - Criticality Assessment Manager - Based on GIS Layer Elements
 - Criticality Assessment Manager - Save Results CSV
- Quick Start Tutorial: CAM
- Demand Analyst
 - DemandAnalyst Interface
 - Demand Analyst Workflow
 - Edit Mapping
 - Usage Partition
 - Demand Analyst Overview
 - Demand Analyst Preface
 - Demand Analyst tabs
 - Pattern Tab
 - Pattern Verification Tab
 - Meter Pattern Tab
 - Junction Pattern Tab
 - Summary
 - Meter Connection Dialog Box
- Designer
 - Steady State
 - Designer - Input Data
 - Designer - Simulation
 - Designer - Output Report
 - Designer - Export
 - Fire Flow
 - Fire Flow - Input Data
 - Extended Period Simulation
 - Extended Period Simulation: Input Data
 - Extended Period Simulation - Simulation
 - Extended Period Simulation - Output Report
 - Extended Period Simulation - Export
 - Designer: Options
 - Advanced Genetic Algorithms Options
 - Quick Start Tutorial: Designer
- IWLIVE Manager
- NetVIEW
 - NetVIEW for InfoWater Pro Overview
 - User Interface for NetVIEW
 - Export InfoWater Project to Google Earth
 - NetVIEW Results in Google Earth
- Protector
 - Overview of Protector
 - Protector Options
 - CityWatch Overview
 - Send CityWatch Notification
 - Contamination
 - Isolation
 - Breakdown
 - Fire
 - Event Trace
 - Vulnerability
 - Alert
 - Notification
