

InfoWater Pro Message Board

The **Message Board** of InfoWater Pro displays various messages pertaining to the model and hydraulic simulation. Warnings, errors, and successful run messages are displayed in InfoWater Pro Message Board. Additionally, you may dock the Message Board to the top or the sides of the InfoWater Pro display window. To do so, place the cursor on the header field of the Message Board hold the cursor down, and drag it to the desired location.

The **Validation** tab of the message board is populated with the reports from the **Engineering Validation Manager** tool. All fields from these tools are displayed in the Validation tab except for the valid range that was used during the data review. In addition, the field of the record that violated a rule is displayed. Click on any column heading to sort by that column.
