

InfoDrainage Tiers

This page provides information on InfoDrainage Tiers and the capabilities for each tier can be found in the table below. For more information about InfoDrainage [Licensing](#) and capabilities, please [contact Innovyze](#).

Tier	Description
Essentials	All the features you need for both conceptual and detailed design, analysis, and audit of sustainable drainage (SuDS / LIDs / WSUD).
Advanced	Everything at the Essentials level plus the ability to deliver BIM workflows via Civil3D® integration.
Premium*	Take the Advanced tier to the next level and demonstrate overland exceedance flow paths using 2D analysis for complete industry compliance.

*Not released yet - scheduled for 2021.
