

System Requirements

Hardware Requirements

The following is a minimum hardware requirements necessary to install and run InfoWater Pro[®] software product:

CPU Speed: 2.2 GHz minimum or higher; Hyper-threading (HHT) or Multi-core recommended.

Operating System: Windows 10 (x64), Windows 8.1 Pro/Enterprise, Windows Server 2012, 2012R2, 2016, and 2019 (64-bit versions)

Processor: Intel Dual Core, Core 2 Duo, Xeon, or greater; SSE2 (or greater).

Memory/RAM: 4 GB or higher.

Screen Resolution: 1024 x 768 recommended or higher at Normal size (96dpi).

Disk Space: 4 GB of free space to accommodate a full setup installation and additional disk space - keep as much free disk space available as possible. Its virtual memory system needs additional free disk space when working on large projects.

Compatible ArcGIS Pro: ArcGIS Pro 2.6.2 through ArcGIS Pro 2.7.2.

Video/Graphics Adapter: 64 MB RAM minimum, 256 MB RAM or higher recommended. NVIDIA, ATI and INTEL chipsets supported.

Networking Hardware: Simple TCP/IP, Network Card or Microsoft Loopback Adapter is required for the License Manager.
